📁 **About :** <https://aboutme-shank.vercel.app/>

I'm a front-end-focused fullstack developer with 5+ years of hands-on experience building scalable web and mobile products using React.js, React Native, and Node.js. I've led engineering for two startups — Kampao.in (a hyperlocal jobs platform) and PropertyFunda.in (a real estate listing app) — where I took ownership of both architecture and user experience. My work spans fast-paced MVP delivery, multilingual UX design, and lean, feedback-driven iteration cycles. I'm also an alum of startup programs at IIM Bangalore and T-Hub Hyderabad, which shaped my product-thinking and execution style. I thrive in early-stage environments where one developer is expected to wear five hats, move fast, and ship with precision.

## WORK EXPERIENCE

Eduvar Software – PropertyFunda.in, Bengaluru, IN  
Founder, Fullstack Developer & Ops.

2023 May – Present

Tech Stack – [ReactJs](#), [NodeJs](#)

- Spearheaded product strategy, user flows, and customer discovery to identify core market need; validated demand through early interviews and prototype testing.
- Managed cross-functional responsibilities: frontend/backend development, roadmap, GTM planning, user onboarding, and analytics.
- Launched MVP in 8 weeks with 1000+ listings within 2 months; iterated based on metrics and user feedback.
- Business Acumen: Gained hands-on experience in product-market fit, pricing, lean startup methods, and acquisition funnels. [Link](#)

Eduvar Software – KamPao.in, Bengaluru, IN  
Co-Founder, Fullstack Developer

2023 Feb – Present

Tech Stack – [ReactJs](#), [React Native](#), [NodeJs](#)

- Developed and launched a multilingual Next.js platform supporting 9 languages in 3 weeks. [Link](#)
- Developed mobile parity using React Native + Expo; ensured consistent hybrid UX.
- Part of Lab32 Cohort conducted by T-Hub Hyderabad – [Link](#)
- Part of LaunchPad conducted by NSRCEL IIM Bengaluru – [Link](#)
- Key Outcome: Gained 7k+ active users in 6 months with 0 ad spend.

ACS Gaming, CA, USA

Mobile Application Developer [ Remote ]

May 2022 – April 2023

Tech Stack – [React Native](#), [Apple Developer Console](#), [AWS](#)

- Maintained and deployed hybrid app using [React Native JS](#).
- Ensured multi-device consistency with manual QA and device-specific optimizations.
- Ensured regulated and strategic distribution of iOS app from the Apple Developer Console.

Kuvera.in [ Acquired By Cred ], Bengaluru, IN  
SDE 2

Sept 2021 – April 2022
